NuSEC

22 instant web hosting advantages by switching onto NuSEC Managed WP from other managed wp vendors.

Managed WP with NuSEC Container-Based Hosting

Managed WP in Shared Hosting Infrastructure

NuSEC ◀ or ▶ Others

1 Manage only your Wordpress. No need to hassle over cPanel and hosting management.

Typically includes cPanel hosting with automatic WP installation but you need to manage cPanel.

NuSEC ◀ or ▶ Others

2 Snapshots are available so you don't have to worry about backing up files to restore, get instant roll-back.

Snapshots are not available but offer standard website backups that require time to restore.

NuSEC ◀ or ▶ Others

3 Easy provisioning of staging sites for making changes or updates to prevent errors.

You have no staging site environment, so when errors happen, its forever indexed on the internet.

NuSEC ◀ or ▶ Others

4 Blueprints are available so you simply setup once and then apply quickly to all the sites in seconds.

You cannot globally work across all sites. Changes will need to be rinsed and repeated.

NuSEC ◀ or ▶ Others

5 Clone a website instantly.

Cloning is not supported but you get standard website backups that restore the latest safe copy.

NuSEC ◀ or ▶ Others

6 Security is already built-in, by default including malware scanners, WAF, DDOS and many more.

Security is an add-on that usually costs per feature but you get a malware scanner for monitoring.

NuSEC ◀ or ▶ Others

7 Dedicated resources for your websites, nothing is shared, we give the best to our paying customers.

Your single server is split between multiple websites. You share resources with all the other websites.

NuSEC ◀ or ▶ Others

8 Optimal performance and bandwidth is guaranteed on all edges.

You will be capped on performance based on traffic to the website, so more site visitors means more costs.

NuSEC ◀ or ▶ Others

9 Enable 100% Cloud-based Auto Healing. Instantly move a website to another availability zone.

Your on a server based infrastructure so Cloud based option is not possible.

NuSEC ◀ or ▶ Others

10 Autoscale dedicated resources automatically ensures high performance at low cost guaranteed.

Autoscaling is not supported.

NuSEC ◀ or ▶ Others

11 Website security is our responsibility, your website will be malware-free from intrusions and hacks.

Hack-free is not possible but offer you to rollback to the last safe backup of your website. That's likely a copy of your site from last year.

Managed WP with NuSEC Container-Based Hosting

Managed WP in Shared Hosting Infrastructure

12 Dedicated resources at the edge makes blacklisted none of your business concerns.

You might get blacklisted since you share IP with other sites.

13 100% Uptime guaranteed. It's good to be on the edge.

99% uptime is guaranteed most of the time. Websites on shared hosting aren't dependable.

14 1 account manages all websites, so stop searching, sharing and memorizing FTP credentials ever again.

Central management is not possible so you need to manage all sites seperately.

15 Define sites based on your customers or clients. Great for agencies or web professionals.

Customer management is not supported. You need manually handle all customers' and websites assets.

16 High availability allows you to run multiple copies of your websites on different origins.

Multiple copies from different origins are not supported. You have only 1 origin.

17 Design using Snapshots for version control and apply it globally to all your sites or customers.

You need to operate manually to copy the entire site, set versioning yourself & install every site instance.

18 Agencies and web professionals can share live designs with customers on staging enviroments.

You need to buy another hosting space to share changes & then copy all changes to original installation yourself.

19 Get access to A/B testing on live production sites to propose new website updates for customers.

A/B testing is not available. You could do fully manual installation, configuration and deployment every time.

20 Deploy your sites to the closest location to your customer base with our high number of origin locations.

Limited origin location support. Moving to different origin is possible via a lengthy support ticket queue.

21 Multi-region & Multi-origin deployment available. Suitable for higher availability and performance.

Multi-region, AZ, Multi-origin is not supported.

22 Global SecureDNS provides low domain resolution time and resilience to all kinds of attacks.

Global SecureDNS is an extra cost, usually $2.99 per month.
