Managed WP with NuSEC Container-Based Hosting

cPanel Shared Hosting

- | | NuSEC | Others |
|----|--------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Manage only your Wordpress. No need to hassle over cPanel and hosting management. | You need to spend time to setup and continuously maintain your cPanel console's huge learning curve. |
| 2 | The latest and most optimized installation of Wordpress comes pre-installed to start right away. | You need to install Wordpress yourself or hire a 3rd party for installation. |
| 3 | Auto backup is enabled on by default and you get unlimited backups at no additional costs. | You need to pay for a 3rd party for backup solution that will usually cost an extra \$3 per month. |
| 4 | WP and Plugins always stay up to date, as well on necessary server components (php, nginx, db). | You need manual WP and Plugins updates on a regularly basis for compatibility and security. |
| 5 | WP DB always stays clean and optimized on the edge for the best site health and performance. | You need to carefully optimize your DB for performance or hire a 3rd party for DB hygiene. |
| 6 | CDN is automatically pre-installed onto any of your websites and apps to start with the edge. | You need to setup either server based caching or CDN yourself, usually an extra cost \$3 a month. |
| 7 | Snapshots are available so you don't have to worry about backing up files to restore, get instant roll-back. | You work only on the current live copy with no backup time machine nor staging sites. |
| 8 | Easy provisioning of staging sites for making changes or updates to prevent errors. | You have no staging site environment, so when errors happen, its forever indexed on the internet. |
| 9 | Blueprints are available so you simply setup once and then apply quickly to all the sites in seconds. | You cannot globally work across all sites. Changes will need to be rinsed and repeated. |
| 10 | Clone a website instantly. | You have no cloning available, every site is a new adventure, good luck. |
| 11 | Security is already built-in, by default including malware scanners, WAF, DDOS and many more. | You need to setup at least a firewall and malware scanners that will usually cost an extra \$9 per month. |
| 12 | Dedicated resources for your websites, nothing is shared, we give the best to our paying customers. | Your single server is split between multiple websites. You share resources with all the other websites. |
| 13 | Optimal performance and bandwidth is guaranteed on all edges. | You will be capped on performance based on traffic to the website, so more site visitors means more costs. |
| 14 | All Plugins and installation in use are best optimized and configured to ensure the top WP performance. | You need to learn, configure and deploy any optimizations to your WP instance(s). |
| 15 | Website security is our responsibility, your website will be malware-free from intrusions and hacks. | Server security is considered, but in the event of a hack or breach, you need to hire a hack remediation service, its usually an extra cost of \$30+. |

|----|-----------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| 16 | Dedicated resources at the edge makes blacklisted none of your business concerns. | Hello, bad neighbor effect. If any site on the shared server resources contains malicious content, your site(s) can be banned & blacklisted. |
| 17 | 100% Uptime guaranteed. It's good to be on the edge. | Websites on shared hosting aren't dependable. A lot of resources are dedicated to server services. |
| 18 | 1 account manages all websites, so stop searching, sharing and memorizing FTP credentials ever again. | You need to implement that yourself since there is no central management for your website. |
| 19 | Define sites based on your customers or clients. Great for agencies or web professionals. | You need manually handle all customers' and websites based on file managers and folders. |
| 20 | Enable 100% Cloud-based Auto Healing. Instantly move a website to another availability zone. | You may have server maintenance or network problems even collocation issues like electrical fires or echos... |
| 21 | Autoscale dedicated resources automatically ensures high performance at low cost guaranteed. | Your site's shared hosting performance will drop if you have more visitor traffic. |
| 22 | High availability allows you to run multiple copies of your websites on different origins. | You get access to one origin over your shared resources. |
| 23 | Design using Snapshots for version control and apply it globally to all your sites or customers. | You need to operate manually to copy the entire site, set versioning yourself & install every site instance. |
| 24 | Agencies and web professionals can share live designs with customers on staging environments. | You need to buy another hosting space to share changes & then copy all changes to original installation yourself. |
| 25 | Get access to A/B testing on live production sites to propose new website updates for customers. | A/B testing is not available. You could do fully manual installation, configuration and deployment every time. |
| 26 | Get the best performance from the edge with granular tweaking and fine-tuning settings. | You need to become a WP expert or get a costly service (\$) to apply fine tuning for your sites. |
| 27 | Rank higher in SEO from faster page load times, thanks to edge nodes and built-in CDN. | You need to setup server site caching and the CDN yourself with no improvement to performance guarantee. |
| 28 | Browse through the best in class section of trusted plugins and themes for Wordpress sites. | You are responsible to use trusted plugins, inspect nonvulnerable versions and apply updates yourself. |
| 29 | Deploy your sites to the closest location to your customer base with our high number of origin locations. | Moving from US-East to US-West? You need to cancel the account to get a new hosting account to migrate. |
| 30 | Multi-region & Multi-origin deployment available. Suitable for higher availability and performance. | Multi-origin is not supported. |
| 31 | Global SecureDNS provides low domain resolution time and resilience to all kinds of attacks. | Good luck changing your DNS. This is bound with your hosting server itself, open to any kind of attacks. |
